Environmental Policy

Wisdom Transport Consultants Ltd recognises that its transport operations have an impact on the environment, primarily through fuel consumption, vehicle emissions, and associated activities. We are committed to managing these impacts responsibly, protecting the environment, and continually improving our environmental performance.

In support of this commitment, Wisdom Transport Consultants Ltd will:

- Meet all applicable environmental legislation, regulations, and other requirements relevant to our transport and administrative activities
- Protect the environment from harm and degradation arising from our activities, including prevention of pollution, minimising emissions, reducing unnecessary fuel consumption, and managing environmental risks associated with vehicle operation
- Consider the natural environment in our operations, including the preservation of natural resources, and the potential effects of our activities on biodiversity and ecosystems relevant to our area of operation
- Consider climate change mitigation in our operational planning, including monitoring and reducing our carbon footprint through fuel efficiency, route optimisation, and planned transition to lower-emission vehicles where practicable
- Identify and control the environmental aspects and impacts arising from our activities, services, and operations, including consideration of the full lifecycle of our services
- Use resources efficiently, with particular focus on fuel use, vehicle maintenance, and waste reduction
- Set environmental objectives and targets aimed at improving environmental performance and monitor progress against them
- Provide appropriate environmental awareness and training to all employees to ensure they understand their responsibilities
- Continually improve the suitability, adequacy, and effectiveness of the Environmental Management System to enhance environmental performance
